Folks, we need to finalize – IDEM is good with this latest version:

U.S. EPA will review all general permits and individual permits for major dischargers listed below. U.S. EPA R5 will timely provide a non-objection letter once any objectionable issues U.S. EPA R5 raised have been resolved. IDEM and U.S. EPA R5 may evaluate the list to identify additional permits for U.S. EPA R5 review based on national and regional priorities and/or permits to remove from the list.

We did review it in draft but didn't confirm that it was final before sending the list. I thought it was better to include it leave it off as our review process goes through final issuance. We can take it off if final

Martha, Bruno,

We used your list and added the 3 permits WECAB just identified at Noon today, Muncie, Lafayette and Indianapolis MS-4.

We also added some language that covers a couple topics we discussed yesterday.

Hoping you find this acceptable, let us know asap, since like you we are under hourly pressure to submit agreed upon language.

Thanks much,

Janet

U.S. EPA will review permits previously identified for review, (just list out all the permits to be reviewed and do not have this vague language as I am not sure what permits have been previously identified) all general permits and individual permits for major dischargers listed below. U.S. EPA R5 will timely provide a non-objection letter once any objectionable issues U.S. EPA R5 raised have been resolved. IDEM and U.S. EPA R5 will may evaluate the list at least annually to identify additional permits for U.S. EPA R5 review based on national and regional priorities and/or permits to remove from the list.
